AI Art Generation Expert | Midjourney | Stable Diffusion | DALL-E

$30.00/hr

My name is Andrew Ramit and I am an experienced AI engineer with a strong background in developing cutting-edge AI models and systems. My expertise lies in the areas of image generation and voice generation using advanced techniques such as Stable Diffusion, Midjourney, and more. I am passionate about pushing the boundaries of AI technology and creating innovative solutions.

Image Generation: I have extensive experience in developing AI models for image generation. I am proficient in using techniques such as Stable Diffusion, which allows for the creation of high-quality and realistic images. I am skilled in working with large-scale datasets and implementing state-of-the-art models to generate visually stunning images.

Voice Generation: I possess expertise in voice generation using AI models. I have hands-on experience with techniques like Midjourney, which enables the synthesis of natural and expressive voices. I am skilled in training models on diverse voice datasets and fine-tuning them for specific tasks such as speech synthesis and voice conversion.

Deep Learning: I have a strong foundation in deep learning techniques and frameworks. I am proficient in working with popular libraries such as TensorFlow and PyTorch. I have experience in training and fine-tuning deep neural networks for various tasks, including image classification, object detection, and speech recognition.

Neural Networks: I have a deep understanding of neural network architectures and their applications. I am skilled in designing and implementing convolutional neural networks (CNNs), recurrent neural networks (RNNs), and transformer models for different AI tasks. I am well-versed in optimizing network architectures for efficiency and performance.

Data Processing: I have expertise in handling and processing large-scale datasets. I am experienced in data preprocessing, augmentation, and normalization techniques to ensure high-quality input for AI models. I am also proficient in working with data pipelines and distributed computing frameworks for efficient data processing.

Model Deployment: I am skilled in deploying AI models in production environments. I have experience in containerization using Docker and deploying models on cloud platforms such as AWS, Azure, and GCP. I am familiar with RESTful API development and deployment for serving AI models at scale.

Collaborative Problem Solving: I have a proven track record of collaborating with cross-functional teams to solve complex AI problems. I am skilled in working with researchers, data scientists, and software engineers to develop end-to-end AI solutions. I am an effective

communicator and can explain complex AI concepts to both technical and non-technical stakeholders.

If you are looking for an 🧠AI engineer🧠 with expertise in image generation, voice generation, and a strong foundation in deep learning, I would be thrilled to contribute to your projects. Please feel free to reach out to discuss how I can help you achieve your AI goals 🥇.

Skills

- ✓ Machine Learning
- ✓ Deep Learning
- ✓ Natural language Processing (NLP)
- ✓ Computer Vision
- ✓ Front-End Development
- ✓ Web Frameworks
- ✓ Back-End Development
- ✓ API Development
- ✓ Database Knowledge
- ✓ Data Visualization
- ✓ Version Control
- ✓ Responsive Design
- ✓ Security Best Practices
- ✓ Model Deployment
- ✓ Programming Languages
- ✓ Problem Solving and Critical Thinking
- ✓ Continuous Learning

Language

- ✓ Australia Native
- ✓ English Native
- ✓ Spanish Native

Employment history

- *AI Engineer| AI Startup Tech Solutions*
  January 2022 – June 2022

  - Developed innovative AI algorithms and models for image recognition, natural language processing, and recommendation systems.

  - Utilized frameworks like TensorFlow and PyTorch to train and deploy deep learning models for various applications.

  - Collaborated with cross-functional teams to understand business requirements and implement AI solutions that meet client needs.

- Integrated AI capabilities into web applications using technologies such as Flask and Django.

- Developed APIs to enable seamless interaction between front-end interfaces and AI-powered back-end systems.

- Contributed to the design and development of interactive data visualizations to showcase AI insights.

- *Web Developer | Web Solutions for AI Growth*
  June 2021 - December 2021

  - Designed and developed responsive web applications using HTML, CSS, and JavaScript.

  - Built interactive user interfaces using popular front-end frameworks such as React.js and AngularJS.

  - Collaborated with UX/UI designers to create visually appealing and intuitive web interfaces.

  - Integrated back-end APIs, databases, and third-party services to enable dynamic data-driven functionality.

  - Ensured cross-browser compatibility and optimized websites for performance and usability.

  - Implemented web security measures to protect user data and mitigate potential vulnerabilities.

- *AI Research Intern | DEF AI Research Institute*
  May 2021 - May 2021

  - Conducted research on deep learning techniques for computer vision applications.

  - Explored methods to integrate AI models into web-based environments.

  - Developed web prototypes to showcase AI research findings and facilitate user interaction.

  - Collaborated with the research team to evaluate and improve the performance of AI algorithms.

- Assisted in writing technical reports and presenting research findings to internal teams.

Education

- The University of Western Ontario

  Bachelor of Applied Science (BASc), Computer science

  2004-2008

- University of Sydney
  Master of Computer Applications (MCA), Computer engineering

  2009-2012
