Lucas Roy

Senior Full Stack Developer

roylucas1023@gmail.com (913) 283-5455 https://github.com/Spacemin8

https://www.linkedin.com/in/lucas-roy-50597232a/

TECHNICAL PROFICIENCIES

Programming Languages :

JavaScript, C/C++, Java, Python, C#, Kotlin, Solidity

Frontend Development :

React.js, Angular, Vue.js, TypeScript, Node.js
State Management: Redux, React-Redux, @Redux/Toolkit, redux-thunk Styling : BootStrap, HTML5, CSS3, Tailwind CSS, SCSS
JavaScript Libraries: RxJs, Lodash, Backbone
React : Hooks, Context API, Class-Based Components, Functional Components Other : SVG, Responsive & Pixel-Perfect UI Integration

Backend Development :

Node.js, Express.js, Nest.js
Python Frameworks: Django, Django Rest Framework, Wagtail
Cloud Services: AWS (including Lambda), Microsoft Azure
Server Management: Postfix (email server)
API Development: RESTful APIs, JSON, XML
Authentication: JWT, Passport, OAuth

Database Management :

SQL Databases: PostgreSQL, MySQL
NoSQL Databases: MongoDB
Query Languages: GraphQL
ORMs: Mongoose, Sequelize, Prisma

Mobile Development :

React Native, Flutter, Android Development with Kotlin

AREAS OF EXPERTISE

- Application Design & Development
- API Development & Integration
- Project Management
- Full-Stack Development
- Web Front-End Development

- Process Improvement
- Data Visualization
- Database Management
- Agile Methodologies
- Requirements Gathering/Analysis
- Software Development Life Cycle
- Data Availability & Integrity
- Project Plans Development
- User Training & Support
- Website Performance Optimization
- Code Review & Quality Assurance
- User Experience Optimization
- Site Testing & Debugging
- Technical Issues Resolution
- Amazon Web Services
- Team Building & Leadership

PROFESSIONAL SUMMARY

Experienced Senior Full Stack Developer with a proven history of creating and managing expansive application stacks. Proficient in both frontend and backend technologies, specializing in Python, JavaScript, and cloud solutions, particularly AWS. Demonstrated expertise in leading teams and optimizing system performance through innovative API development and CI/CD pipeline implementation. Skilled in Agile methodologies, I have successfully delivered robust solutions that enhance efficiency and reduce costs. A collaborative problem-solver committed to leveraging technology to drive business success and improve user engagement.

PROFESSIONAL EXPERIENCE

Uvik Software, *Solution Architect* Aug 2022 – Mar 2024

- Led a team to deliver backend solutions using Python and Django, boosting API performance by 30%.
- Streamlined the SDLC with Agile practices, reducing development time by 20%.
- Enhanced cloud architecture with AWS Lambda, lowering infrastructure costs by 15% while processing over 100,000 products through Python web scraping.

Galliot, *Senior Full Stack Developer* Jul 2021 – Jun 2022

- Developed and delivered over 30 frontend projects using React.js and Vue.js, collaborating closely with backend teams to create seamless API interactions with Node.js and Python/Django.
- Enhanced system performance by 25% through efficient API development and the implementation of robust security measures like OAuth and JWT.
- Designed and optimized scalable cloud infrastructure on AWS, reducing latency by 20% and effectively managing server load.

Galliot, *Full Stack Developer* Jul 2019 – Jun 2021

- Developed and deployed high-performance APIs with Django Rest Framework and FastAPI, achieving a 35% reduction in response time.
- Streamlined workflows with CI/CD pipelines using Docker and Jenkins, boosting project delivery efficiency by 20%.
- Led API integration projects using REST and GraphQL, enhancing client engagement and improving data retrieval speed.

Digia Technology, *Frontend Developer* Oct 2017 – Apr 2019

- Developed internationalization features that contributed to a 30% increase in global user engagement.
- Implemented Firebase for real-time data sharing, improving collaboration time by 25%.
- Enhanced user experience by integrating APIs for seamless data synchronization across platforms.

Argos Infotech, *Mobile App Developer* Feb 2015 – Jul 2017

- Developed APIs that facilitated real-time data exchange, boosting user engagement by 30%.
- Enhanced mobile app performance using Kotlin and React Native, achieving a 25% reduction in load times.
- Implemented push notification services with Firebase, leading to increased user activity and retention.
